BIOMASS

Members of the project management on an official visit to the Municipality of Marko

DESUWOW - Development of professional skills for the use of Urban solid Waste and Organic Wastes in agriculture.

The official management meeting was held on 15 and 16 November in the Municipality of Marco in Portugal.

Representatives of partner organizations together with the host organization had the opportunity to hold constructive meetings with members of the municipality of Marco de Canaveses.

Their issues that matter were based on the development and effectiveness of biomass and bioenergy. Additionally, they discussed how to include young people in environmental projects.

Recep Aydin and Miguel Carneiro

Dissemination & Impact Strategy

Throughout the internal meetings, the team members investigated the operation which done so far and made parallels with the achieved goals and set aims. Partners responsible for the development of Intellectual Outputs, Ismail Hidayat, presented Intellectual Outputs: Training Kit and Handbook. Both IOs contain basic knowledge of biomass, tips for further action and training methodology.

Association Best - Seller

During the second working day, the hosts organized a visit to the municipality of Vila Boa do Bispo. The warm welcome of mayor Miguel Carneiro and the presentation of the Municipality left a great impression.

Furthermore, business representatives presented examples of good practice if environmentally conscious instructions are followed. The Naturanat presentation, as part of the field visit, encouraged participants to share experiences and whether this is applicable in the countries they come from.
