DESUWOW - Official meeting in Belgrade, Serbia

Despite measures against the coronavirus and other occurrences that are unfortunately happening in Europe, members of the management team of the DESUWOW project met in Belgrade. The meeting consisted of two working days during which participants had the opportunity to listen to the outstanding lecturer Milan Stevanovic - expert in Agriculture, Technology and Sustainable Development.

We also visited 3 production plants related to agriculture, which deal with different types of production.

Field visits were examples of various entrepreneurial activities and the application of modern technology.

DESUWOW - Official meeting in Belgrade

The craft shop Ambalažerka was founded in 1996, The need for wooden fruit crates was indispensable, because of plantation development from year to year. When founding the craft shop, all the necessary work was done by family members. The original location of the company was a garage in the yard of the Nikolic family. In 2007, the independent craft shop Ambalažerka changed its legal norm and became Ambalažerka doo.

What they produce now?

FRUIT BOXES
PATOS FOR CRATES
ELEMENTS
RAILS
PALLET

During the second working day, the hosts organized a field visit to the Cold Storage Brestovik. The facilitator was Milan Savkovic, bachelor of agriculture. He encouraged participants to share experiences from their countries and presented how Serbians grow fruit.

Cold Storage Brestovik & Winery at the Faculty of Agriculture

Throughout the visit, the team members went into the cold storage and saw how machines assort the fruit in their special boxes. The operation is led by humans, but the biggest part of the work is based on technology.

Last but not least visit was the Visit to the Winery at the Faculty of Agriculture (Radmilovac). Our host was Sonja Jovic, oenologist and sommelier.

In the middle of the last century, the endowment holder Milan Vukićević left a significant part of his property to the University of Belgrade. In addition to several real estates in the center of Belgrade, the will from 1941 also gave the University a property in Vinča, named after Milan's wife - Radmila. Thanks to this endowment, today the University of Belgrade can boast of one of the most important assets in Southeast Europe, which preserves valuable genes of agricultural species.
